	Examiner Quang T. Van	Art Unit 3742	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Specification

2. The abstract of the disclosure is objected to because it has more than one paragraph. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ueda et al (US 6,133,558) in view of Yoshino et al (US 6,172,348). Ueda discloses a microwave steam heater comprising a first high frequency heating step for high frequency heating the frozen commodity to the vicinity of a melting temperature (col. 5, lines 5-12); a steam supplying step for starting a steam, when forming a film of dew condensation on the surface of the frozen commodity (Col. 5, lines 42-49); and a second high frequency heating step for high frequency heating the frozen commodity after the start of the steam supplying (col. 5, lines 13-15). However, Ueda silent about detecting a temperature by measuring the temperature of the frozen commodity. Yoshino discloses the step of detecting a temperature by measuring the temperature of the frozen commodity (col. 19, lines 43). It would have been obvious to one ordinary

skill in the art at the time the invention was made to utilize in Ueda the step of detecting a temperature by measuring the temperature of the frozen commodity during the first high frequency heating step and detects that the measured temperature has reached the melting temperature as taught by Yoshino in order to provide thawing and heating the food with a desired temperature to prevent over heat the food.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Quang T. Van whose telephone number is 571-272-4789. The examiner can normally be reached on 8:00Am 5:00Pm M-F.
